Ergonomic keyboards

R-Go Split Break

1. **ULTIMATE FREEDOM**
The R-Go Split Break consists of two separate parts for maximum freedom.

2. **ULTRA-THIN DESIGN**
The keyboard is ultra-thin which stimulates better blood circulation. This prevents physical complaints.
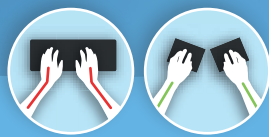

3. **LIGHT KEYSTROKE**
Has a light keystroke, so you need less power to type.

4. **PATENTED BREAK INDICATOR**
Contains the patented R-Go Break tool. Colour turns green when you are good to go, orange when it's time to take a break and red when you skipped a break.

5. **STRAIGHT WRISTS**
Prevent RSI-complaints by typing with straight wrists.

''Not only is this keyboard small in size and thinly designed: like a real ergonomic keyboard should be, this keyboard can also be placed freely in two separate parts on the desk.

R-Go Break

Ergonomic keyboards with break indicator

Short movements during your working day are vital for your health! Micro breaks prevent overloading of small muscles and tendons and improve your concentration.

Because breaks are often forgotten when you are focused at work, we've developed a break tool that reminds you to pause your work on time.

The patented **R-Go Break software** uses colour signals to indicate when it's time to take a break. During keyboard usage, the light changes colour, like a traffic light:

- Green: good job!
- Orange: time for a short break
- Red: You've been working too long

This way you will get positive feedback about your break actions.

For using the R-Go Compact Break and the R-Go Split Break, download the R-Go Break software: **www.r-go-break.com**
